11. Villages should be shifted from unhealthy sites and loans given to persons wishing to build houses and help in materials from State and District Forests also given. (Para 29.)

29. A very important question is that of shifting of villages. Since much illness in the malnad is due to the villages being situated in valleys a mere shifting of them to higher levels would itself greatly reduce disease. Special efforts should be made therefore for removing villages from insanitary localities to sites higher up and keeping them free of rank vegetation. It may be possible to add to the rules under the Mysore Village Sanitation Regulation a rule for condemning sites that have been found to be decidedly unhealthy and making residence on such sites an offence under the Regulation. Some such measure is necessary because mere persuasion has been found to be of not much avail in the past and the welfare of the malnad demands compulsory removal of thoroughly insanitary villages to safer localities. Arrangements should of course be made before condemning any such old site to have a convenient and healthy new site marked and made into house sites and provided with a drinking water well. Some help may also be given in such cases for the building of houses. Advances may be given on personal security under the takavi rules and also help in the form of house-building materials as stated in paragraph 40 below. Shifting of villages

to Compulsorily Shift Villages from ~~[illegible]~~ unhealthy to healthy localities. Even if Govt. undertake the power, I am afraid it can scarcely be exercised unless they have a very liberal scheme of financial assistance to Village Construction. What is really required is when a Village has to be shifted, is help in the construction of houses. In addition to all the last Mysore Provincial Co-op. Conference, the Bombay Secretary said that Co-op. House building ~~[illegible]~~ could most usefully be introduced into Villages. The Registrars may perhaps be asked to consider the question and submit a report to Govt.

I quite agree with the Gl Secy that what is wanted for getting people to shift to another & healthier village site is not compulsion but money help. Govt have recently declared their willingness to finance Housebuilding Co-op. Societies as far as possible at market rates of interest. I daresay that the Apex Bank may also be induced to set apart a portion of their funds for the purpose.

15 I may be assumed that the first thing to do, when a village is to be shifted is to organise the inhabitants into a Co-operative Society & this the local authorities will have to set about with the help of the Reg. of Co-op. Societies.

Enc.....

Office of the Sanitary Commissioner
with the Government of Mysore,

Bangalore, dated the 16th March 1927.

From

B. Mahomed Usmon, Esq., L.M. & S.,
Sanitary Commissioner with the Government of
His Highness the Maharaja of Mysore, Bangalore.

To

R. Ranga Rao, Esq., B.A.,B.L.,
General Secretary to the Government of
His Highness the Maharaja of Mysore, Bangalore.

Sir,

With reference to your letter No. G. 6173/San. dated the 7th December 1926 on the subject of making an addition to the rules under the Mysore Village Sanitation Regulation, for condemning sites that have been found to be decidedly unhealthy in the Malnad, - I have the honor to state that the scope of the existing Regulation as well as of the rules thereunder comprise the following matters:-

(a) Regulation of the conservancy.
(b) Provision for the protection of water-supplies.
(c) Prohibition of public nuisance, and
(d) Improvement of sanitation of villages in other similar respects.

It will be clear that the Regulation itself will have to be amended if it has to deal with the larger question of legalising the condemnation of unhealthy sites and shifting villages to better localities. Personally I am of opinion that no action is called for at present to invoke the aid of Law to enforce the shifting of villages. An executive order of Government would be just as effective and, provided that necessary facilities are given, it is not likely that villagers would actively oppose a measure of such obvious benefit to themselves. So far as I am aware, there has been no instance reported of any active opposition to the attempt which local authorities have here and there been taking in this direction.

The

The essential thing needed is the display of rather than sustained interest by the local authorities/the passing of a law to enforce compliance on the part of the people.,

I have the honor to be,

Sir,

Your most obedient servant,

M Monroe

A.R.M. Sanitary Commissioner, M.G.

Shifting of Villages to healthier sites.

Passes orders about the facilities to be given for the ——.

READ—

The extract from the report of the Malnad Improvement Committee of 1925, about the shifting of villages from unhealthy sites, loans to be given to persons to build houses and the grant of building materials from State and District Forests.

2. Letter No. C. 349, dated the 14th March 1927, from the Sanitary Commissioner in Mysore, reporting on the above subject.

3. Government Order No. D. 8471-2—C. S. 499-26-10, dated the 2nd April 1927, passing orders about the facilities to be given to House Building Co-operative Societies.

ORDER NO. G. 3024-35—SANY. 20-27-2, DATED 15TH SEPTEMBER 1927.

The Malnad Improvement Committee of 1925, considered that villages should not only be shifted to higher and healthier localities, but also kept free from rank vegetation. They thought that perhaps coercive measures would be necessary to effect such shifting, and that the Village Sanitation Regulation would have to be suitably amended. The Committee also added that help in the form of takavi loans and house building materials should be given by Government.

2. The Sanitary Commissioner who was consulted in the matter stated that as the Village Panchayet Regulation and Rules thereunder which repeal the Village Sanitation Regulation and Rules, provide for the regulation of conservancy, provision of water-supply, prohibition of public nuisance and improvement of sanitation in other respects, and that as in respect of shifting villages from unhealthy to healthy localities, there had been no opposition on the part of villages, he did not see the necessity for legislation in the matter.

3. Government agree with the Sanitary Commissioner. They think that the main trouble in the shifting of villages is not the unwillingness of the inhabitants but want of funds. To enable the villagers to get the necessary funds, Government consider that House Building Co-operative Societies should be established in large numbers wherever possible. Whenever a village is to be shifted from an unhealthy to a healthy locality, the people may be persuaded to form themselves into a House Building Co-operative Society. Any assistance which the Society may stand in need of will receive the sympathetic consideration of Government.
